Insert the cover and close it tightly

**Charge the battery**

Before using your phone for the first time, charge the battery to full capacity

**Dear customer, thank you for choosing a mobile phone of the Czech brand EVOLVEO. Recommendations for caring for your phone and using it safely :**

- The EVOLVEO StrongPhone Q1 is designed to be significantly more durable than a regular mobile phone, however, it is not indestructible.
- The EVOLVEO StrongPhone Q1 mobile phone has been certified as IP68. However, this standard does not guarantee complete waterproofness of the device.
- The phone is waterproof and dustproof provided that the following conditions are met: the back cover is tightly closed; the phone is not submerged deeper than 1.5 meters for more than 60 minutes; the water must be fresh. Occasional use in chlorinated swimming pools is possible provided that the phone is rinsed with clean water afterwards. Do not use in seawater or saltwater pools. Improper use of the device voids the warranty.
- Prolonged exposure to metal filings and other metal particles can damage, for example, the speaker or earpiece and is not covered by the warranty.
- This phone is a complex electronic device, so protect it from shocks and magnetic fields.
- Due to many different uses, such as whether or not the back cover is properly closed, we are not responsible for liquid damage.
- The phone's display is made of glass, which can crack if dropped on a hard surface, if subjected to a strong impact, or if the display is bent or otherwise deformed. If the display is damaged, do not attempt to repair it. Glass cracked due to misuse or abuse is not covered under warranty.
- Clean the phone immediately if it gets into contact with products that can cause stains, such as ink, dyes, make-up, food, oil, etc.
- Do not use window cleaners, household cleaners,

aerosol sprays, solvents, alcohol, ammonia or abrasives.

- If your phone falls into water, do not press the buttons, wipe it immediately with a dry cloth and let it dry freely before switching it back on.
- Do not attempt to dry your phone with an external heat source such as a microwave or hair dryer.
- The phone is designed to operate in temperatures from 0° to 40°C and can be stored in temperatures from -20° to 45°C. Lower or higher temperatures can affect the phone's behaviour and battery life.
- Do not use your phone outdoors during a storm, we are not responsible for any damage to your device or health related to this use.
- Do not pierce the speaker, insert objects into the holes, or paint the phone - all of these activities affect the functionality and tightness of the phone.
- EVOLVEO MaxPhone Q1 has been tested in accordance with EU standards for radio waves, WiFi and Bluetooth.
- If you want to limit the effect of radio frequency energy, limit the time of direct exposure to radiation, e.g. by using a Bluetooth hands-free kit, or keep a greater distance between your body and the phone.
- Never repair your phone yourself, disassembly of the phone, including removal of external screws, may cause damage to the phone that is not covered by the warranty.
- Importers, distributors and resellers are not liable for any loss of data or direct or indirect damage caused by the operation of the phone, however caused.

Troubleshooting**Your phone cannot be switched on**

- the button to switch the phone on was not held down long enough
- hold the power button for at least 3 seconds (or longer)
- battery is weak, charge the battery

SIM card failed

- check or replace the SIM card

Charging your phone has failed

- contact is defective, check contacts, replace cable or charger
- the charging voltage is too low, charge for about half an hour first, then disconnect and reconnect the charger and charge the battery fully
- wrong charger, use the right charger

Cannot make phone calls

- SIM card has failed, check or replace the SIM card

Partial call failure

- Incorrect phone number, check the phone number
- Incorrect settings, check call blocking

Incorrect PIN code

- you have entered the wrong code three times, contact the operator

Cannot send SMS message

- the service is not activated for your SIM or the SMS centre number is not set, contact your operator to set the parameters

Automatic locking error

- entering the wrong code (forgotten code), contact the EVOLVEO Service Center

Mobile phone switches itself off

- battery is weak, charge the battery
- Error in settings, check if the automatic shutdown function is not activated
- accidental failure, switch the phone back on

The phone does not ring on an incoming call

- the volume is turned down to minimum, adjust the volume again

Phone lock

This feature protects your phone from unauthorised use by others. The reset password is "1234".

The warranty does NOT cover:

- installing firmware other than the original firmware installed in the EVOLVEO phone from the factory
- electromechanical or mechanical damage to the phone caused by improper use by the user (e.g. cracked display layer, cracked front or back cover, damaged USB power connector, SIM card slot, microSDHC card slot or headphone input, etc.)
- damage to the speaker and earpiece by metal particles
- damage from natural influences such as fire, water, static electricity, increased temperature, etc.
- a defect caused by normal wear and tear
- damage caused by unauthorised repairs
- the firmware of your phone if it needs updating due to changes in the network parameters of mobile operators
- defects in the mobile phone operator's network
- the battery if it does not maintain its original capacity after more than 6 months of use (the battery capacity warranty is 6 months)
- intentional damage

Warranty and post-warranty serviceRepairs and servicing can only be carried out at an authorized service point for EVOLVEO phones (more at www.evolveo.com), otherwise you may damage your mobile phone and lose your warranty.**AUTHORIZED SERVICE**Abacus Electric, s.r.o.
